Michael Sawyer completed a 6 month internship within my team at HP Networking. He was a member of a team using Agile Software Development methodologies and was unanimously considered a valuable member of the team. In joining an in-tact team, Michael was quick to integrate himself into the team and begin taking on responsibilities. He first worked alongside other team members, but it was not long before he was also leading efforts within the team. He even provided leadership and mentoring to another intern who joined the team later.

In his work Michael proved to have the ability to quickly learn new technologies and tools and even took the lead in introducing new tools into our development environment. Michael used his knowledge and experience to be the expert in certain areas of technology. He always showed good judgment in planning his activities and delivered on all projects and tasks that he was assigned or took on.

I highly recommend Michael and believe that he will be a significant asset to any software development team.

Sincerely,

A handwritten signature in black ink that reads 'Kevin Porter'.
